

# IMAGINeradiology™ Practice Management Suite

IMAGINeradiology™ is TPI's flagship product.

## The Ultimate Billing Machine

IMAGINeradiology™ improves cash flow, streamlines processes and provides unprecedented, real time productivity management. Advanced technology leverages staff capabilities for a true “new generation” billing/collections effort.

### The IMAGINeradiology™ Product Suite

**Practice Manager**, the system foundation, provides comprehensive billing, collections, and reporting specific to the needs of your practice with no limit to tax-id or database size.

**AutoCoder** enables you to auto code both CPT and ICD-9 from paper and electronic reports utilizing the experience of your coding staff.

**EOBreeder** can automatically post payments from paper EOB's or electronic remittance.

**iDashboard**—Monitor your practice success with real-time graphic illustrations of your practice's current performance. You can incorporate goals, track achievement and create individual dashboards to suit your needs.

**trueICE**, our 4<sup>th</sup> Generation Smart Imaging Technology, is your single source for storing and retrieving all your account information.

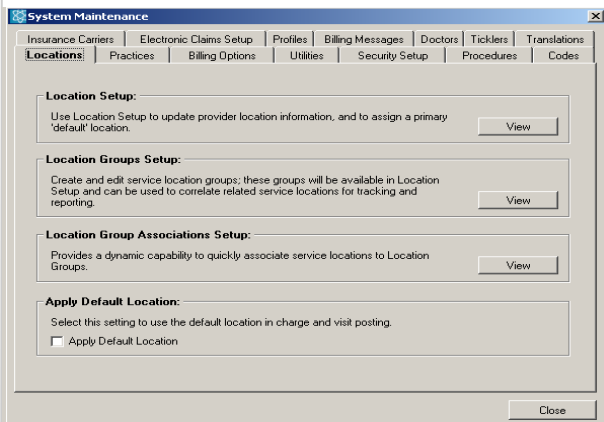

**Ad Hoc Reporting**—This powerful tool gives system administrators the ability to retrieve and manipulate raw IMAGINE data, from drop down menus, into a rich text or excel file format for custom reports.

### Key Features of IMAGINeradiology™

- Control Your Billing Operation with Technology
- Reduces Manual Data Entry up to 80%
- Superior Data Capture and Validation
- Eliminates the Paper Chase
- Associates and Stores Images at Account Level
