IMAGINE Software Announces New IMAGINE 10th Anniversary Edition

Charlotte, NC – Technology Partners, Inc. (dba IMAGINE Software), a leading provider of medical billing technology, announces the latest edition of its flagship product, IMAGINE 10™, in honor of the company's 10-year anniversary.

In preparation for the full release of IMAGINE 10™, the industry's first intelligent multi-platform channeling practice management system, specific user-driven functions have been implemented to include new templates, filters, builds, and drill downs for reporting, ticklers, and dashboards, as well as enhanced VoIP capabilities, advanced product integration features, and exclusive utilities to aid users with auditing, PECOS, and ICD-10. Additionally, custom configurations have been added to increase existing "hands-free" billing automation capabilities within the IMAGINEappliance™, boosting efficiency and reducing costs. Production testing on IMAGINE 10™ will begin with approximately 40 practices, followed by a general release to all IMAGINE clients in 2011.

"Customers can expect the most powerful IMAGINE yet," said Charles Kauffman, VP of software development. "The intelligent channeling technology coupled with the single database design is a game changer. Our initial benchmarking showed retrieval speeds of over 250,000 patient records per second. This will allow IMAGINE users to experience immediate response times on large data sets for real time demands without the need of replication or secondary servers."

"Radiology and the healthcare industry as a whole are changing rapidly, and while change is inevitable, progress is not," stated Sam Khashman, CEO of Technology Partners, Inc. "We take pride in achieving true progress by consistently raising the status quo for medical billing systems, providing our clients with a reliable practice management system that offers both the essential technological advancements to address the shifting needs of today as well as anticipate and prepare for the future. Currently, the IMAGINE platform is the backbone for more than 5,000 physicians, many of which are nearing decade-long tenures, and with each new edition, IMAGINE continues to set the bar higher by helping our users be competitive and successful."

All enhancements and upgrades within the IMAGINE 10th Anniversary Edition are being offered to IMAGINE clients at no additional cost, and the IMAGINE team will provide a variety of complimentary training sessions and webinars to introduce users to the new functions within the system.

About Technology Partners, Inc. (dba IMAGINE Software) and the IMAGINE system

Technology Partners, Inc. (dba IMAGINE Software), a Microsoft® Gold Certified Partner, has led the way in innovation of automated medical business management solutions for ten years with its flagship product, IMAGINEradiology™. A vast array of Microsoft-inspired tools and features allow IMAGINE 10™ to offer complete integration. The IMAGINE System has been heralded for its ability to streamline the billing/collections process, improve staff productivity and increase practice profitability with unsurpassed processes. IMAGINE offers its own Smart Imaging Technology, an Auto Coder feature, Appliance Processing, an EOB Reader, and Direct-To-Payer Claims Submissions, as well as electronic remittance. The IMAGINE team offers cutting edge products and services that are revolutionizing workflow automation for practices and billing offices. With the full support of its customers, leadership, and partners, TPI provides solutions that expand to accommodate the changing needs of today's medical practices.
