## **IMAGINE Software Announces the Unveiling of the Industry's First Intelligent, Multi-Channeling Practice Management System at User Conference**

**CHARLOTTE, NC** – IMAGINE Software, a leading provider of medical billing solutions, announces the success of its fifth annual User Conference where the latest version of the IMAGINE practice management suite, IMAGINE V 10™, was revealed. Held in Charlotte on April 13-15, the conference generated a record turnout of IMAGINE clients, partners and industry leaders from across the country.

During the conference, attendees had the opportunity to experience peer learning, hands-on product demonstrations, an in-depth look at current changes within the healthcare industry, and explore different components of the system in sessions led by the IMAGINE team.

The highlight of the event was a showcase of the latest version of the IMAGINE Suite, IMAGINE V 10™. Featuring a variety of user-driven enhancements, IMAGINE V 10™ includes new modules, templates, filters, builds, and drill-downs for reporting, ticklers, and dashboards, as well as improved VoIP capabilities, advanced product integration features, and exclusive utilities to aid users with auditing, PECOS, and ICD-10. IMAGINE V 10™ is currently being used by a number of IMAGINE pioneer clients and will be released to all users at no additional cost later this year.

“The IMAGINE Software User Conference creates an excellent environment for our clients to learn more about IMAGINE products and services, as well as offer their ideas on ways in which we can improve,” stated Sam Khashman, CEO of IMAGINE Software. “This year was no exception. We were extremely excited to unveil IMAGINE V 10™, the most recent version of the IMAGINE Suite to our client base, as the majority of feature enhancements within this version came directly from the suggestions of our users. The positive response to IMAGINE V 10™ throughout the conference was overwhelming and continues to drive our commitment to providing each IMAGINE client with the tools they need to achieve success.”

### **About Technology Partners, Inc. (dba IMAGINE Software) and IMAGINeradiology™**

Technology Partners, Inc. has led the way in developing and supporting automated medical business management solutions for 11 years with its flagship product, IMAGINeradiology™. A wide range of Microsoft-based office tools and features makes integration and conversion to IMAGINE easy. The IMAGINE Suite has been heralded for its ability to streamline billing/collections workflow, improve staff productivity and increase practice profitability with an unsurpassed billing engine and collections automation that reduces the lifecycle of claims. IMAGINE offers its own advanced document imaging technology, an Auto Coder feature, EOB Reader, and direct-to-payer claims submissions, as well as electronic remittance. The IMAGINE team offers highly acclaimed products and services that have revolutionized the way practices and billing offices do business. With the full support of its customers, leadership, and partners, TPI provides innovative products that expand to accommodate the changing needs of today's medical practices.
